Print-and-Play Fabrication _{3D-printed Interactive Objects Without Assembly or Calibration} Carlos Tejada University of Copenhagen The first 3D printer: The SLA-1 from 3D Systems

Previous Work	
110110410 1101K	
• Requires engineering expertise:	
• Assembly of parts	
risseriory or pares	
 Assembly of circuits 	
• Calibration of models	
	-
Print-and-Play Fabrication	

Print-and-Play Fabrication	
Printed, not assembled.	
• Lowering the difficulty.	
zowering the dimestry.	
o Increase adoption.	
Print-and-Play Fabrication	
No assembly of parts or circuits.	
No calibration.	
Minimal disruption of original geometry.	

Print-and-Play Fabrication	
Well-studied concepts (e.g. acoustic resonance, fluid dynamics).	
• Structures that leverage these concepts.	
Print-and-Play Fabrication	
Benefits:	
Only internal structures are modified.	
Only internal structures are modified.	

Print-and-Play Fabrication

BlowholeBlowing-Activated Tags for Interactive 3D-Printed Models

- Resonant, spherical cavities, with tubular openings.
- Variations in tube length, and cavity volume, vary the resonant frequency.

- Printed as a single structure.
- Use mathematical equation to identify interactions.

Blowhole GI '18

BlowholeBlowing-Activated Tags for Interactive 3D-Printed Models • Susceptible to external, acoustic interference. • Only 6 locations.

Blowhole GI '18

AirTouch CHI '20

AirTouch 3D-printed Touch-Sensitive Objects Using Pneumatic Sensing

- Pneumatic sensing.
- Flow distribution structure.
- From compressed air source to outlets in the surface.
- Outlets from 0.65 to 1.5mm in diameter.

AirTouch 3D-printed Touch-Sensitive Objects Using Pneumatic Sensing Covering each causes an identifiable pressure increase. • Printed as a single structure. Uses pre-trained machine learning models to identify interactions. **Ongoing Work**

Ongoing Work	
Embed computation on fabricated objects.	
Reduce the need for assembling circuits.	
• First steps: Logic gates.	
• Physical toolkit for experimenting.	
• Embed resulting design inside a 3D-model.
